

A close-up, high-angle photograph of a brown leather chair seat. The seat is the central focus, showing the texture of the leather and the fine stitching along its curved edge. The background is a dark, textured surface, possibly a rug or carpet, which is out of focus. The lighting is soft, highlighting the contours of the seat.

Club tavolini coffee tables Beistelltische

Club tavolini coffee tables Beistelltische

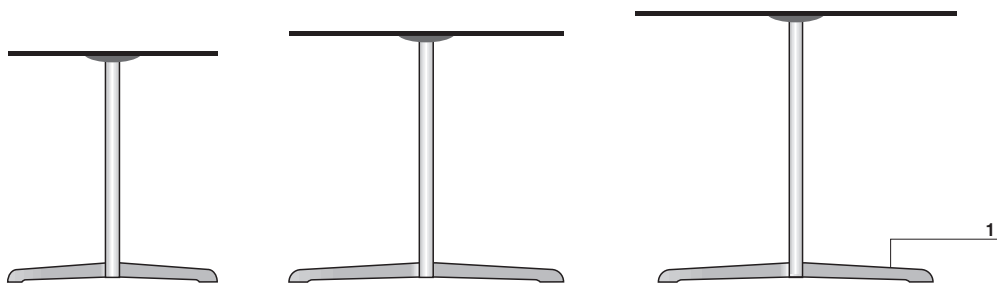

**Caratteristiche:** Serie di tavolini di 3 misure e altezze diverse accostabili e sovrapponibili. **Struttura e finiture:** Struttura e finiture: Piano in laminato stratificato finitura wengé, spessore mm. 12, piano in metallo rivestito in rigenerato di fibre di cuoio color testa di moro, tagliato e cucito al vivo oppure piano in marmo Nero Marquina o Emperador, spessore mm. 20. Il marmo è un prodotto naturale, che presenta di volta in volta venature, concentrazioni di colore e macchie chiaro scure sempre diverse. La superficie può presentarsi irregolare e in alcuni punti può risultare più o meno lucida, queste sono caratteristiche che determinano la naturalità del marmo stesso, quindi queste imperfezioni devono essere accettate in quanto caratteristiche inevitabili e naturali di questi materiali. Specialmente il marmo Emperador e il marmo Nero Marquina presentano normalmente e per loro struttura numerose fessure, microfrazure, fori e micro fori. Quelli più evidenti vengono resinati, stuccati, ricostruiti. Questo non pregiudica la qualità o la tenuta strutturale del prodotto. Base in pressofusione di alluminio verniciata color bronzo.

**Features:** Series of 3 coffee tables of different sizes and heights matched and overlapping. **Structure and finishes:** Stratified laminate top in wengé finish, thickness 12 mm, top in metal covered by dark brown regenerated leather fibres with visible cut and sewing or top in Nero Marquina or Emperador marble, thickness mm. 20. . Marble is a natural material showing veins, concentrations of colour as well as light and dark spots which are different every time. The surface may appear uneven and in some places it may be more or less shiny, these are characteristics that determine the naturalness of the marble itself, therefore these imperfections must be accepted as inevitable and natural characteristics of these materials. Emperador and NerMarquina marbles show in their natural form numerous cracks, micro-cracks, holes and micro holes. The most evident ones are sealed, plastered or rebuilt, but this does not affect the quality or structural strength of the product. Base in die-cast aluminum painted bronze.

**Eigenschaften:** Serie von 3 Beistelltischen verschiedener Größen und Höhen, aufeinander abgestimmt und überlappend aufstellbar. **Struktur und Ausführungen:** Top in Schichtlaminat in Farbe Wengé, Stärke 12 mm; Metalltop mit dunkelbraunem Bonded Leder mit Steppnaht oder Marmortop in Nero Marquina oder Emperador, Stärke 20 mm. Marmor ist ein Naturprodukt, das abwechselnd Äderungen, unterschiedliche Farbkonzentrationen sowie helle und dunkle Flecken zeigt. Die Oberfläche kann uneben und an einigen Stellen mehr oder weniger glänzend sein. Dies sind Eigenschaften, die die Natürlichkeit des Marmors bestimmen. Diese Makel sind zu akzeptieren, da unvermeidliche und natürliche Eigenschaften dieses Materials. Insbesondere der Marmor Emperador und der Nero Marquina weisen normalerweise zahlreiche Risse, Mikrorisse, kleine Löcher auf. Die am sichtbarsten werden verharzt, verputzt und rekonstruiert. Dies beeinträchtigt in keiner Weise die Qualität oder strukturelle Stabilität des Produkts. Untergestell in Aluminium-Druckguss in Bronzefarbe.
